☐ I have Read and Agreed to the [User Agreement](#) and [Privacy Policy](#)

Register

5. Check your email and note the Verification Code

Enter the verification code and accept the User Agreement and Privacy Code.

The screenshot shows the 'Installer Registration' screen on an Android phone. The status bar at the top shows the time as 10:11 am, signal strength, and a 96% battery level. The screen has a back arrow and the title 'Installer Registration'. The registration form includes the following fields:

- Company Invitation Code ***: X88Q5WGD
- Username ***: 945-West-St
- Password ***: MapleSyrup23\$ (with an eye icon to toggle visibility)
- Confirm password ***: MapleSyrup23\$ (with an eye icon to toggle visibility)
- User Email ***: FredMaple23@aol.com
- Verification Code ***: 768900 (with a 'Resend' button next to it)

Two orange arrows point to specific elements on the screen:

- An arrow points from the text 'From the email sent above' to the 'Verification Code' field.
- An arrow points from the text 'Read and agree Policy' to the checkbox area at the bottom.

At the bottom of the form, there is a checkbox with a blue checkmark and the text: 'I have Read and Agreed to the [User Agreement](#) and [Privacy Policy](#)'. Below this is a large blue 'Register' button.

Press Register and a Splash screen will be displayed after a short delay

Now Log in to your new Account.

Agree to User Agreement x 2 times

The Univers application will now display a list of your Virtual Power Plants but if it is the first time then there are no plants listed.

Select the Me option at the bottom right of the screen.

Wifi setup

Make sure your phone has Bluetooth enabled and a wifi network available, you will be prompted to enter the wifi password so please have that handy.

NOTE that the wifi device can **ONLY** communicate with 2.4Ghz band devices but most modern home routers support dual band.

Select the Heatpump WiFi Settings

The Barcode scanner screen is displayed.

NOTE - Cover the QR code while scanning the barcode.

Press the Scan button to scan the barcode on the TANK, please note it is NOT the Wifi module barcode – it is the silver label on the right hand side of the water heater.

It is also worthwhile to keep a photo of the serial number and model for your records.

The App will check the database to see if it was previously registered during an STC Registration, it is normal for units to not be registered.

Skip the message.

As instructed press and hold the Bluetooth Pair button for 1 second, the top and bottom LED will flash until finally the bottom LED is solid and only the top LED is flashing

Tick to confirm wifi and Bluetooth is available and then press the Next button

The phone will now gather a list of available Bluetooth devices available to your phone, note this could include speakers and other household devices.

The centre of the device name such as “113D” below matches the barcode on your iStore Wifi module.

A complete list will then be displayed, press the connect button for the phone to communicate with the iStore module via Bluetooth.

The phone confirms the Bluetooth communication, press next.

The phone will now search and prepare a list of wifi devices available. NOTE that the wifi device can ONLY communicate with 2.4G band devices.

Select/tap your wifi router.

Enter you password and double check with the view icon prior to pressing OK

The App will now begin the registration process of your iStore water heater and Wifi device. Please be patient while the registration takes place.

Registration is now completed successfully

There should be 3 solid LEDs illuminated on the Wifi device as below

IF the wifi router does not support 2.4GHz, or the wifi password is incorrect, or the network coverage is poor, the process will need to be repeated after checking these details before selecting the reconfigure button.

HOME PLANT CREATION

IMPORTANT – IF you already have an iStore home solar inverter system then please call iStore on 1300 851 985 to have your new iStore water heater added to your existing home plant.

To create your new home plant press the Next button

The Water Heater will now be connected to your account, wait a few moments for it to connect and be displayed as a device inside the app.

Tap the Next button.

The first screen displayed is to enter all of the Basic Information required. The phone will attempt to determine your Country/Region but if not automatically filled then please Tap the Country/Region selection

If your location is NOT automatically filled the select your Country, State and the City selection

DO NOT press Next at this point, scroll down the page to display and complete the further information required.

Further information is required at this point.

- DST – select appropriate
- Plant time zone – should be prefilled correctly
- Please Enter the installer company and contact email
- The National Meter Identifier(NMI) is to be filled in with the last 11 digits of the iStore water heater serial number. Simply leave off the “A0” from the serial number. In this example the serial number was A022405068100 and therefore the NMI should simply be the barcode minus the first two letters and be entered as 22405068100.
- DO NOT set the Network Provider.

A Feed-In Tariff screen will be displayed for Solar system generation which is not relevant for a stand-alone iStore water heater.

Tap Next

To Confirm Revenue is not required

Tap OK and then NEXT

Your Plant will now be created.

Tap Apply to accept there is no iStore solar system installed.

Plant creation successful.

Tap

Your new plant is displayed within the iStore Univers application.

Tap on your Plant to display the next level of information

Tap the Devices button in the top right corner

The devices within your plant are displayed

Tap on your new Water Heater

Your Water Heater status screen is now displayed.

Please Refer to the iStore Univers Operation Manual for details of operation.
